

# Mac Office Server **with our** **PBX Enhancement**

<http://www.apple.com/server/macosx/features/simple-administration.html>

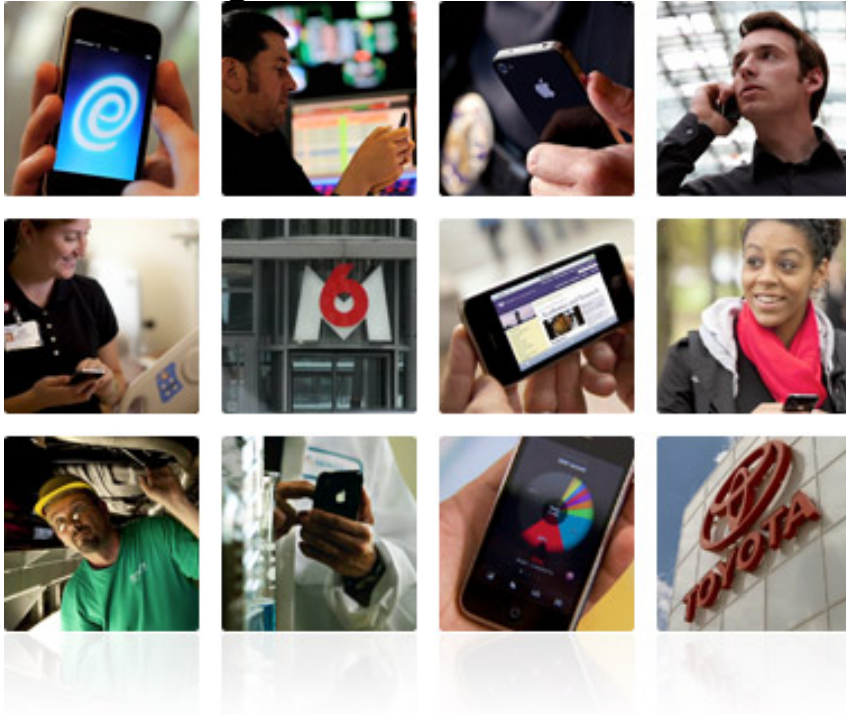

# iphones in Business

## Business App's

- ✓ *State of the art design*
- ✓ *Best rated by Employees*
- ✓ *Now with Business Class management*

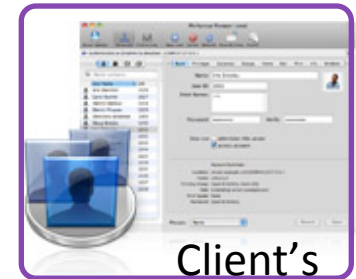

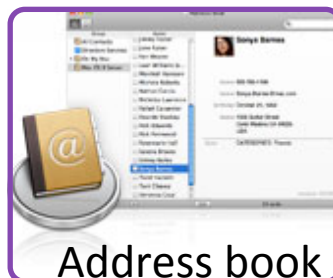

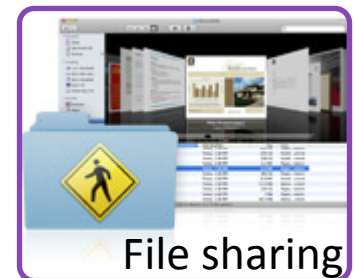

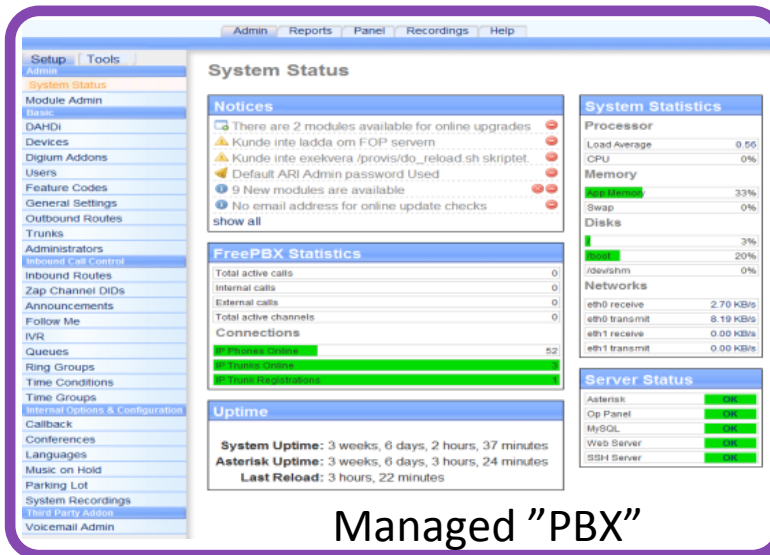

## Business Segments

# Ipad in Business

- Use as your desktop phone
- Enjoy listening to your favourite music while working
- Ipad mutes when phone rings
- Control your MAC mini Phone-Server including your phones and phone system
- Use all other App's from Appstore
- Become real mobile

# Integrated Phone PBX in your Server

Either you are a Mac user or not. If you are, our iSWITCH for Mac IP-PBX is ideal for your company. Traditional proprietary PBX and PABX systems tie you in with 1 manufacturer. With an IP PBX phone system like ours, which used open standards, you have more choice and flexibility, giving you a robust and feature rich phone system.

- ✓ Benefits of a Mac OS IP-PBX
- ✓ Mac OS is rock solid and runs forever
- ✓ If you are Mac house the installation is very easy, install program does it for you
- ✓ Default install comes with template layout of extensions and other accounts
- ✓ Technical staff control the IP-PBX
- ✓ Web Interface for configuration
- ✓ System, Domain and User access via the web interface
- ✓ Integrate with other Microsoft Products
- ✓ No need for extra modules like:
- ✓ Expansion slots
- ✓ Voicemail Cards
- ✓ Auto Attendant Cards
- ✓ Conference Cards
- ✓ Work with existing PSTN connections or use SIP trunks
- ✓ Choose from a multitude of IP Phones
- ✓ Use a Softphone when out on the road
- ✓ Use mobile devices as part of the phone system
